

A List of Plant Species Native to Broward County

Below is a list of the 733 Broward native species listed in the Institute of Regional Conservation (IRC) database. George Gann, Keith Bradley, Steve Woodmansee, and others then at the IRC did the most scientific work focused on comprehensively identifying the South Florida native species.

Sometimes differences between the native status or plant name in the IRC database and the Atlas of Florida Vascular Plants (Institute for Systemic Botany) are detailed in the IRC account of the species. Visit both databases online at: regionalconservation.org (Floristic Databases Online, South Florida, FISF Database "here" at the bottom of the window) and florida.plantatlas.usf.edu.

In the future, we intend to add a separate list of Broward species that is included in the Atlas, but absent in the IRC determination, for those interested in these determinations and discussions. This list is can be printed and taken into the field. We welcome all corrections and suggestions that will improve this list. Please email Richard Brownscombe, Richard@Brownscombe.net.
